

Immune System Support

Quantum Colostrum

*World-Class Immune System Support**

Available in capsules
or as powder

Quantum Colostrum
Great Immune Support
for the whole family*

What is Colostrum?

*Colostrum is a special fluid secreted by a mother for about 3 days after giving birth. It is rich in protective life-giving factors, including multiple immune system support**

The Best Colostrum

- 100% Whole Colostrum
Not defatted which compromises its intracellular transport
- From Organically Fed, Happy Cows
Not from commercial cows treated with drugs and synthetic hormones
- Low Temperature, Air-Dried
Not freeze-dried or highly heated

- **Broad-spectrum immune system support***

Contains human-active immunoglobulins with a whopping 21% minimum immunoglobulins (IgG and IgA)

- **Richest source of natural MSM**

*A sulfur compound which helps promote a strong and healthy immune system**

- **Rich in Lactoferrin (6 mg./gram)**

A natural compound which helps to promote healthy oxygen transport in the blood

- **From organically fed, happy cows that have never been ill**

- **Free of synthetic hormones and toxic chemicals**

No hormones, antibiotic residues or other drugs

Quantum Colostrum

*The Finest Quality Organic Colostrum
To Help Promote and Maintain A Strong Immune System**

What's The Difference?

O u r s	T h e O t h e r G u y s
<p>1. Low-Temperature Air-Drying Our colostrum is carefully air-dried at low temperature to ensure full activity of all the colostrum's immune-enhancing factors.*</p> <p>2. Guaranteed Immunoglobulins Our certificate of Analysis guarantees that our product contains a whopping 21% IgG (immunoglobulins).*</p> <p>3. Organic Colostrum Our colostrum is from only organically fed, happy cows that have never been ill. They receive no hormones, antibiotics or other drugs. Rarely, if a cow does fall ill, it is never again used to supply colostrum. Super healthy cows provide quality colostrum which is superior in all its active factors.</p> <p>4. No Binders or Fillers Our colostrum capsules contain 100% pure colostrum powder with absolutely NO binders or fillers. We also offer our colostrum in bulk powder so it is easy to scoop into your favorite health shake.</p> <p>5. 100% Vegetable Capsules We use only 100% vegetable capsules, not gelatin (beef) capsules, so there is no fear of consuming deadly prions, which can cause infection.</p>	<p>1. Other products may contain colostrum which has been highly heated, defatted, hydrogenated or taken from sick or commercially fed cows. Inferior colostrum has poor biological activity.</p> <p>2. Other products may contain much less IgG or IgG damaged from poor processing.</p> <p>3. Other products may contain colostrum from cows that have been fed commercially (with toxic or pesticided feed), subjected to drugs (such as growth hormones or antibiotics), or were sick during the colostrum collection. Sick cows provide poor quality or even toxic colostrum.</p> <p>4. Other products may contain colostrum with undisclosed fillers or binders. Avoid colostrum in tablet form. Tablets are typically made with high pressure and heat which degrade the ingredients.</p> <p>5. Other products may use gelatin capsules, typically made from commercial beef hooves, which may carry the risk of prion infection.</p>

MAGNIFICENT MR. CAPSULE

- Nutrients retained in their original form
- Easy to absorb
- No damaging heat or pressure
- No degrading of nutrients
- No rancid oil by-products
- 50% better absorption than tablets
- Easily breaks down in stomach
- No toxic glues, binders, lubricants

CAPSULES:

THE SUPERIOR CHOICE

MISERABLE MR. TABLET

- Up to 20,000 lbs. per sq. inch is used to smash ingredients into a tablet
- Creates damaging heat and pressure
- Can degrade nutrients up to 25%
- Often creates rancid by-products
- 50% poorer absorption than capsules
- Often seen whole in the toilet
- Liver-toxic glues, binders and lubricants
-- usually not listed on the label

Vegetable Capsules Vs. Gelatin Capsules

We use 100% pure, preservative-free vegetable capsules which dissolve rapidly, regardless of the food temperature, unlike gelatin capsules which are hard to digest, temperature-sensitive, contain toxic preservatives and carry the risk of "mad cow" prion exposure.
