

# **HCL Detox Therapy**

*Eliminating Impervious Biofilms  
For Superior Immune Function*

## **The Master Immune Detox Therapy**

In the 1930s, medical pioneers discovered that a dilute, natural-source HCL solution when specifically combined with potassium and other mineral salts was an incredibly efficient media to eliminate even serious, long-standing infections. It was safe, efficient and easy to use -- taken orally several times daily. So outstanding were the results that numerous medical researchers found it uncompromisingly beneficial for every condition they used it for -- from tonsillitis to malaria to cancerous tumors.

Without question, they realized that this HCL solution could break down impervious polysaccharide sac surrounding virulent disease organisms such as tuberculosis -- with almost unfailing resolution of the condition. Today, we know that over 99% of all infections in the body exist in these sacs, which we now call biofilms.

In our current times of many chronically ill people, worldwide research now links most major degenerative diseases to underlying, hidden infections. Such a simple, efficient, safe and highly effective therapy to eliminate biofilms as they used in the past is now badly needed.

For HCL Detox Therapy, natural-source betaine HCL (hydrochloride) is combined with potassium-rich, natural substrates that together create a unique, highly ionized complex that is fully capable of detoxifying and bursting the biofilm sacs (where infectious organisms hide and have become impervious to the immune system). This allows the immune system (previously locked out) to easily enter the biofilms and successfully attack and kill the virulent micro-organisms. Now, just as the medical researchers were able to do over half a century ago, we have an effective method for clearing biofilms and the degenerative, infection-driven states they cause.

### **Ingredients**

**Quantum Betaine HCL Vcaps**

**Quantum HCL Activator**

### **Directions**

Open 1 to 2 Vcaps of **Q. Betaine HCL** and 1 to 2 Vcaps of **Q. HCL Activator** into 1/4 cup purified water. Stir briefly until dissolved. Drink the mixture 1 to 3 times daily after meals. After preparing the mixture, consume immediately or within 5 minutes (if you wait longer than 5 minutes, the HCL loses its potency). Therefore, do not prepare it ahead of time.

**For People with Toxic Dental Work or For Sensitive Body Types:** For those with toxic dental work, gum infections or for sensitive people (such as Vata-dominant body types): after mixing the HCL Detox drink, take approximately 25% of the contents into the mouth, rinse the mouth, then hold the contents for about 30 seconds, then spit out. This procedure helps to neutralize pathogenic organisms in the mouth (so they are not swallowed). Next, immediately remix the remaining HCL Detox drink, then drink. This procedure help to minimize detox symptoms.

**Caution:** Exercise caution with those in kidney failure or those with high white cell counts (as in leukemia, etc.). After ensuring that they have adequate baseline nutrient support, start slowly with HCL Detox Therapy, using only one HCL drink per day made with only 1 Vcap of each product, immediately following the main meal (lunch). In some cases, you may recommend the HCL drink only every other day.

Young, very strong people and very large people can take up to 2 Vcaps of each product in 8 oz. water, 3 to 6 times daily.

**Please note:** HCL Detox Therapy tends to detoxify the head and mouth areas first, so if there are congested lymph areas in the head and neck areas, then swelling symptoms may occur. In these cases, then reduce the HCL doses and consider external detoxification (such as the Medi-Body Packs) of the congested areas.
