

Quantum Multi-Pollen Extract

For Superior Energy & Health, Especially For the Urinary Tract*

Key Uses of Flower Pollen

- In worldwide use to boost athletic endurance and strength*
- Immune system builder*
- Promotes healthy prostate function, including healthy free flow of urine*
- Supports healthy urinary tract function, including healthy urination*
- Encourages liver detoxification
- Provides broad-range nutrients for healthy blood factors & arterial function*
- Promotes healthy lung, kidney and stomach function*
- Boosts natural energy and performance*
- Supports healthy menopause
- Promotes healthy hormone balance and reproduction/fertility capacity*

The
Quantum
Solution
for
Hormone Balance
for Men and Women*

Flower Pollen

Flower pollen and pollen extracts have long been used for centuries for various health concerns ranging from fatigue to prostate to reproductive issues. Pollen is collected as honey bees visit the flowers of seed-bearing plants, such as cereal grasses, to obtain nectar. Pollen contains a vast array of nutrients, vitamins, amino acids, enzymes and other phytonutrients.

People from many different cultures around the world have used pollen as a time-proven, natural way to boost the

body's energy and immune system. Pollen has been shown to be a powerful antioxidant and world-class immunoregulator. It helps protect the liver and balance hormones. It also greatly increases energy. All these benefits with absolutely no side effects.

Pollen is nutrient-rich and chemically very complex, but the exact composition depends upon the plant which produced the pollen. Unfortunately, variations in the composition of pollens from different plants have led to disputes in

Get The Best Pollen Extracts

- **Unique breakthrough in pollen processing**
Breaks the pollen's tough outer casing; liberates the full spectrum of phytonutrients, making them fully bio-available
Unlike other pollen products which are typically poorly digested
- **Multiple sources of European pollen**
Ensures the broadest range of phytonutrients
Not just one pollen source with a narrow range of factors
- **Pollen collected only from pesticide-free, pure water areas in European countrysides**
Not pollen from American, pesticided, poorly grown flowers
- **Special pollen cleaning process: 100% allergen-free**
No dust, dirt, gum or impure resins
- **100% pure vegetable capsules: no binders or fillers**
No tablets with toxic tagalong fillers, binders or glues; no magnesium stearate (a hydrogenated oil); no gelatin capsules with toxic preservatives & an inferior absorption profile

the scientific literature over benefits and efficacy.

Traditional Uses

Written historical records indicate that pollen has been used as a food nutrient concentrate and health rejuvenator for at least 2,000 years. In China, typha pollen (*puhuang* from the flowers of the cattail *Typha* spp.) was described in the *Shen Nong Ben Cao Jin* (circa 200 B.C. to 100 A.D.) and has been part of the medical literature since the 7th century A.D.

Pharmacological and Biological Activity

Reviews of scientific studies with pollen generally emphasize the importance of the pollen source. Meticulous processing to assure potency and freshness is also a critical yardstick of pollen benefits. Finally, the many potential allergens must be uniformly eliminated or the benefits can be outweighed by toxic or allergic reactions.

The Prostate and Reproductive Tracts

Special pollen extracts have clinically been proven beneficial to promote healthy male and female reproduction systems, including prevention and treatment for problems with the prostate. Multi-pollen extracts have been used in Europe, North America, Japan and the Middle East.

These multi-pollen extracts have become popular because they can be engineered to meet an ideal phytonutrient profile, thereby out-performing any single pollen source. Double-blind, clinical study results with men with prostate concerns have been so encouraging that in Japan, multi-pollen extracts are highly regarded as an clinically effective adjunct for the prostate, especially for stubborn cases.

Taking pollen extracts can also help increase the levels of natural zinc in the prostate, which aids healthy prostate function and activity.

Smooth Muscle Relaxation & Urination

Clinical studies have demonstrated that multi-pollen extracts were remarkable help in relaxing the urethral smooth muscles, allowing the bladder to be fully emptied, thus promoting healthy urination.

Bladder/Urinary Help For Men & Women

Clinical research demonstrates multi-pollen extracts ability to help to relax the bladder's smooth-muscles and the urethra, thus promoting healthy urination and a healthy urinary tract.

Significant Menstrual & Menopause Help

Clinical studies show that multi-pollen extracts can help menstrual problems as well as help females sail through menopause. In addition, multi-pollneextracts are highly beneficial for reproductive health. in females.

Pollen's Spectacular Phytonutrient Content

Quantum Multi-Pollen Extract contains European pollen fractions from multiple sources which are standardized according to our proprietary, highly effective amino acid and phytosterol profile.

Our pollen extract is guaranteed to contain beta-sitosterol, diamines and derivatives of feruloylputrescine (FP), cyclic hydroxamic acid as 2, 4 dihydroxy-2H-1, 4-benzoxazin-3 (4H)-one (DIBOA), secalosides A and B, kaemperferols, luteolin, crude protein and rutin. The following phytonutrients are listed in ranges due to the naturally occurring variations in batch to batch of living pollen sources. Each 100% vegetable capsule contains:

Pollen Nutrients	Amount
Total Multi-Pollen Extract	300 mg.
Amino Acids	up to 72 mg.
Free Amino Acids	up to 20 mg.
Lipids	3 to 65 mg.
Complex Carbohydrates	up to 143 mg.
Simple Sugars	13 to 33 mg.
Carotenoids and flavonoids	7 to 8 mg.
Natural Vitamin C	up to 20 mg.
Stabilized rice bran (with over 100 known antioxidants)	150 mg.

How is Quantum Multi-Pollent Extract *different*?

Quantum Multi-Pollen Extract is a collage of the best-source European pollens processed using state-of-the-art technology and equipment yielding the most potent, non-toxic, chemical free, 100% allergen-free pollen extract.

To avoid the typical toxicity found in many other pollens, we have chosen to use a blend of only grade 10 European pollen sources to allow us to achieve an optimal, proprietary amino acid and phytosterol profile with the broadest range of beneficial effects without toxic pesticide residues so common in American pollen sources.

Guaranteed Potent: 100% Allergen-Free

A special European process yields a super-clean, allergen-free pollen that is the state-of-the-art. Once the harvested pollen cleaned (so it is 100% allergen-free), it undergoes novel proprietary extraction processes to assure concentration of both the water and lipid soluble components. This process perfectly concentrates the widest range of these delicate phytonutrients. This process also demands tenacity. It takes **10,000 flower tops to yield just 1 kilogram** of our "once living", contaminant-free, highly potent pollen extract. Simply, the best of the best. "Nutrition that Really Works"TM *Try it and feel the difference.*

Recommended Use: Adults or children (age 4 and up): take 1 Vcap, 1 to 3 times daily. For special programs, up to 10 Vcaps may be taken daily.
