

The Q-Disc

The Next Generation, “Smart” Cell Phone Disc

The Q-Disc is truly the Next Generation, “Smart” Cell Phone Disc. This new, thin, sleek disc is a more powerful Cell Phone Disc that works on all types of cell phones, including the newer cell phones. In creating this disc, our goal was to bioenergetically protect the cellular biophotonic communication of the wearer from all types of cell phone emissions.

Through many trials and tribulations, we were pleased to finally discover the power of paramagnetic harmonic values via the use of a combination of earth-based elements. Thus, inside the Q-Disc is a proprietary media consisting of a full spectrum of highly paramagnetic elements which are then encased in our Vastu-designed, geometrically precise Q-Disc sheath.

Please enjoy the power and elegance of this unique disc for your own personal bioenergetic cell phone harmony.

Recommended use: Gently clean the exterior surface of the back of your cell phone to eliminate any dust or grime. Then simply peel off the adhesive on the back of the Q-Disc and then firmly place the Q-Disc on the back of your cell phone, approximately in the middle. Please keep the Q-Disc on your cell phone at all times. Avoid getting the Q-Disc wet. If your cell phone (and its Q-Disc) accidentally get immersed in water, please return the Q-Disc for reconditioning (for a small fee). Please do not open the Q-Disc to view its internal media; if you do so, some of its granular elements may escape and thus render your Q-Disc inoperable.
