

Live-Source Iodine

Xeno-Detox

Quantum-State, Marine-Source Iodine Complex

*Advanced Thyroid, Hormone and Fat Metabolism Support**

**Quantum-State
Marine Complexes**
*for Superior Thyroid
and Hormone Receptor Detox*

Key Benefits

- Features six key sea vegetation complexes with botanical synergists, which contain a full spectrum of naturally occurring vitamins, especially B vitamins, minerals and trace minerals
- Rich in naturally occurring iodine, especially important in thyroid function, hormone balance and fat metabolism*
- An excellent detoxifier of xeno-estrogenic compounds (i.e. pesticides, synthetic hormones, toxic chemicals) to support healthy hormone balance*

Xeno-Detox is engineered to support the body's ability to achieve healthy hormonal function, especially regarding the reproductive organs. Its unique feature is its ability to rapidly detoxify xeno-estrogenic compounds, such as pesticides and synthetic hormones found in commercial meat, poultry, dairy and synthetic hormone replacement therapy.

One of the major components of **Xeno-Detox** is live-source iodine, which dramatically outperforms non-live sources. In fact, no amount of non-live source iodine can compare to the effects of live-source iodine compounds, especially when combined with key synergists, cofactors and essential transporters. This quantum-state combination rapidly restores cell resonance to those that are in greatest need.

The latest research highlights the fact that some natural progesterone hormone creams may appear not to work at times, when in fact the real problem is that a blockade of hormone receptor sites in the

body have been significantly compromised due to xeno-estrogenic compounds, especially at the thyroid. Live-source iodine can effectively and rapidly detoxify these xeno-estrogenic compounds. Then, the full beneficial effects of the progesterone cream can be attained.

In just the past year, we have had a number of women complain about not receiving the significant benefits ascribed to natural progesterone cream therapy. However, when natural-source iodine was administered, allowing badly needed xeno-estrogen detoxification, not only was their thyroid function boosted, but simultaneously their progesterone utilization skyrocketed. Then, the benefits of natural progesterone were fully bioavailable.

In addition, the pristine-harvested sea vegetation in this formula is extraordinarily high in trace elements, including exotic elements such as iridium and rhodium, which are known to activate subtle energy systems of the body critical to quantum-state bioenergetics.

High Natural Iodine Content

Natural iodine content per capsule..... 297 mcg

Recommended Use

Adults or children (age 4 and up): Take 1 capsule, 3 times daily, for 1 to 3 months for thorough xeno-estrogenic detoxification. One capsule may be taken daily for long term use or indefinitely as an ideal source of live iodine, trace minerals and continued xeno-detoxification. This product is particularly safe in comparison to synthetic-source iodine (which can cause toxic reactions).
